

FOR IMMEDIATE RELEASE

April 08

Wizz Communications enhances connectivity options with a new point of interconnect at Global Switch in Sydney.

Wholesale Microwave access provider Wizz Communications has commissioned a further point of interconnect at Global Switch in Sydney.

In response to strong market demand, Wizz Communications now has a point of interconnect (POI) within the Global Switch data centre in Sydney for existing and prospective wholesale partners.

“Having multiple interconnect locations is a central goal of ours,” outlines Ellis Spooner, Sales and Marketing Manager for Wizz. “We want to ensure that we make it as easy and cost effective as possible for existing and prospective partners to interconnect to our network and access our wholesale Ethernet access services.”

“This additional POI caters for the needs of our partners who are increasingly locating their networks in carrier agnostic facilities. Global switch has an excellent reputation as a data centre and is well populated with network service providers who can make use of Wizz Communications Ethernet access services.”

Enquiries regarding interconnecting with Wizz Communications at Global Switch should be directed to sales@wizz.com.au
