

**Wizz Communications strengthens its team**

Wizz Communications, the wholesale provider of licensed and unlicensed Microwave access services has recently strengthened its team with two new appointments.

The technical arm of the business gains Martin Salece who will head up the site engineering team that manages site surveys, and installations for Wizz service delivery.

Martin's experience in electrical & communications engineering combined with his project management skills reinforces the existing team. Salece says 'Wizz is always striving for the highest quality service to its customers, and I am delighted to be joining a team with that mindset.'

Wizz Director David Jones says, "Martin will bring an added layer of quality control to the engineering side of the business and closer operational liaison for partners, resellers and end customers."

Also recently appointed at Wizz, as the Sales and Marketing Manager for the business, Ellis Spooner says ' Wizz is a growing carrier and as such a natural requirement for more people exists, division of labour has worked for centuries and freeing up the team to focus on network expansion will deliver significant advantage to the business. I'm passionate about our Channel business model and I'm very pleased to be operating in a wholesale only environment, representing a product and a team here that deliver so well is a privilege.'
